Larry M. Barfield, P.E., F.NSPE is currently Chairman of the Board and President of Binkley & Barfield, Inc. (BBI). He also serves as Chairman of the Board for two BBI subsidiaries and wholly owned companies, Landev Engineers, Inc. (Land Development Engineering) and Baseline Corporation (Professional Land Surveying). His mentoring leadership and “hands-on” approach provides value and client dependability, drawing attention from both the public and private sectors. For nearly four decades, Mr. Barfield has participated in and managed a long tenured and experienced staff of engineering professionals in the successful completion of challenging engineering assignments throughout Texas and the greater Houston area. Over his distinguished engineering career, he has performed as a Project Engineer, Project Manager, and Principal-in-Charge on some of Houston’s most prestigious infrastructure projects.

**Professional Leadership:** Mr. Barfield participates in and provides leadership on numerous committees within state and local engineering organizations, having held every officer position. He held the office of State President of the Texas Society of Professional Engineers, and has served as President of local engineering organizations including the Greater Houston Chapter of TSPE, Houston Council of Engineering Companies, Houston Engineering and Scientific Society, and the Professional Engineers in Private Practice Division. On the national level, Mr. Barfield served as the National Society of Professional Engineers Southwest Region Texas Representative as well as on several national committees including the National Membership Committee and the National Sponsorship Development Task Force. He has also been an active board member of the Texas Engineering Foundation and the Society of American Military Engineers.

Giving generously of his firm’s resources, Mr. Barfield encourages his staff members to devote the necessary time to serve in Professional Engineering Societies to enhance and broaden their professional development. Under his mentorship and encouragement, his firm has had six Engineering Society Chapter Presidents emerge from its ranks and is grooming several others for future advancement. Most importantly, he continues to mentor our next generation of engineers by serving as a volunteer and supporter for the TSPE Math Counts and Scholarship Programs, as well as other math and science fairs and competitions.

**Community Leadership:** His civic-minded reputation is supported by many active leadership roles and various levels of participation within many diverse organizations, including the Knights of Columbus, Boy Scouts of America, youth and high school sports programs, fraternal organizations, church communities, and professional college organizations. He has served on the Texas A & M University Department of Electrical Engineering’s External Advisory and Development Council, and as a member of the Texas Aggie Band Association Board of Directors. He also served as President of the St. Elizabeth Ann Seton Parish Council and Facilities Planning Committee. He is currently an active supporter of the Leukemia Society and the Prince of Peace Catholic Church, where he has been a long time supporter of the Christian Ministry Food Pantry and the Adopt a Family for Christmas Program.

**Honors:** As a highly respected engineering professional, Larry does not seek personal recognition. Nonetheless, his peers have chosen to honor him on several occasions with personal and public accolades. In 1997, he was selected as a Fellow in the Society of American Military Engineers, and in 2001 he was selected as a Distinguished Engineer of the Foundation by the Texas Engineering Foundation. The National Society of Professional Engineers honored him by naming him a Fellow Member in 2005 for his exemplary service to the society, engineering profession, and the community. This year he has been honored with his most impressive accolade to date -- his engineering peers and colleagues have recognized him for his outstanding engineering career and long-standing professional reputation in the Greater Houston Area by selecting him as the 2010 Houston Engineer of the Year.
